# What we stand for?

We are a qualified and produce top innovative windows and doors according to the cachet of the HKH for 3 decades. Own developments of high intrusion-resistant doors and windows are some of our standards. Glass facades we finished a post / beam construction. The latest energy saving regulations are exceeded via eg triple glazed windows and doors by far. This manufacturing technique that is sustainable, you can purchase as Turnkey factory with sophisticated energy production hall, which we hereby grants to you, (**red**) Present:

# Our product range

- Bullet resistant windows / doors
- Preservation Windows / Doors
- Box double windows / doors
- Plastic windows / doors
- Wood-aluminum windows / doors
- Wood-windows/doors
- Alu-windows/doors
- Sunshade Canopy
- Wood-aluminum glass casement windows / doors
- floodlights
- glass facades

# Wood-aluminum glass casement windows / doors

This innovative unique window / door system is tilted Westerwold weather as expected in the wings to open, is in high quality segments

- office
- housing
- houses and
- Villas used.

It is, for example, high burglary-resistant, bullet-resistant, sound-and heat insulated.

# investment

- Payable with investments amounting to € 80 million over an 8 step-payment plan.

That is, after 8 months you get on the "green Meadow "of your choice for a turnkey, with per Production day 10,000 m<sup>2</sup> wood-aluminum glass leaf Including windows / doors and glass facades production one-time fee for production technology. The factory / building is used as a passive house standard produced, the energy / electricity itself is generated.

# production

- The factory produces a daily production of 5,000 m<sup>2</sup> aluminum clad wood Windows / Doors and 5.000m<sup>2</sup> glass facades including the Insulating glass panes and the necessary 6400 Meter Mullion / transom wood manufactures.
- In the production of 720 employees in 3-layer are operation (240/Schicht), 7.5 h; 6 days a week for 40 hours with one months Holiday activities.

# production

- The windows / doors are on the outside of aluminum Jacket on plastic with lots of glass casement, weather tilted freely in the wings to open, and on the inside made of wood (of all kinds). the Glass panes of the windows / doors are as in the Bonded glass facades and can in all variants done (heat / sound-Bullet-resistant).
- The Passive House standard is a framework supplement Filling material used,  $0,7\text{m}^2\text{K}$ . With this modern design receives the / all windows / doors, a "hard-glazed" outside - view whereby an intrusion is hardly possible. 10 years warranty.

# production

- The glass walls (panels 2.60 m and less than or greater Wärme/Schall- or Bullet-resistant) received a encircling the bar glued to the glass and with the Post and beam construction is screwed out of wood.

- In the spaces are depending on the nature Attached fall protection and set seals.

# Business partner / company

- For the machinery / equipment and a company are Weinig and Bohle and transport Company VW / MAN to be contractually bound.

# The factory

- Next to on a 30,000 m<sup>2</sup> area, a 8,000 m<sup>2</sup> Production hall (5 meters high) and 2x 4000 m<sup>2</sup> Before / warehouse partly covered with 2,500 m<sup>2</sup> outbuildings for employees as a passive house Standard glass fronts with post / rail and electrically opening tilt windows be built. The factory will therefore produce their energy, electricity itself. In Poland (Czarnkow and Gorzow), we have, from-taken the glass facade, comparable factories created.

# Glass facades / adhesive

- In the Asian / Russian space will be € 25 million  
Monthly production costs at 100% load  
including license fee for the adhesive of glass  
facades (m<sup>2</sup> glass 25, - €, per meter 65/55 mm  
Wood 5, - €, Wages/ hour / 1, - €) incurred.

# profit

- 10,000 m<sup>2</sup> wood-aluminum glass casement windows / doors and Resulting glass facades as daily production in production days per year 2,310,000 m<sup>2</sup>. with be € p / m - a sales gain of 127.  
    **€ 300 million profit attainable.**
- If placed German sales prices based increases the gain by a factor of 8 to  
    **€ 2.4 billion per annum**
- Weinig Times Issue 1/2014 last page under SPECIAL: € 2.156 million savings per annum for reduced demand for wood.  
Cracked down on projecting offer \* means a payback within **12** or **2.5** months incl. earnings impact of the total investment of € **80** million.  
\* 600, - € / m<sup>3</sup> wood Shopping
